

Megapoly[®]

Add value to your crops with this high performance potash fertilizer

32% K₂O
(26.6% K)

6.7% MgO
(4.0% Mg)

24.3% SO₃
(9.7% S)

8.6% CaO
(6.2% Ca)

Main features

- New effective potash fertilizer, rich in nutrients such as potassium, calcium, magnesium and sulphure
- Powerful combination of quick-release and prolonged-release nutrients to suit crop needs
- Suitable for different soil types and wide variety of crops
- Can be applied pre-planting or as top dressing
- Created by extrusion granulation, with no filler, and delivers high nutrient use efficiency
- Enhances drought tolerance and disease resistance in crops and reduces risk of lodging

Main advantages

- Multi-nutrient synergy between potassium, calcium and magnesium
- Combination of quick-release and prolonged-release potash nutrients reduces the potash fertilizer input needed, saves costs, improves quality and increases net income
- Extends shelf life, improves appearance and taste of fruits and vegetables
- Enhances the photosynthesis by crops which improves yield and quality
- Promotes synthesis of protein and oil which enhances marketability of products
- Very stable and mixes well so is ideal in blends combined with organic, compound or other fertilizers

Recommended application rates for different crops

Nutrient content table

K ₂ O	32%
SO ₃	24.3%
MgO	6.7%
CaO	8.6%

Corn
225-300 kg/ha

Wheat
225-300 kg/ha

Rice
225-300 kg/ha

Groundnut
225-300 kg/ha

Sorghum
225-300 kg/ha

Sugar beet
225-300 kg/ha

Banana
1-1.5 kg/plant

Eucalyptus
1-1.5 kg/tree

Sugar cane
375-450 kg/ha

Cotton
300-375 kg/ha

Oilseed rape
300-375 kg/ha

Soybean
225-300 kg/ha

The recommended rates above are for reference only. Please determine planned dosage according to the actual use of other fertilizers and the residual fertility of the soil. For more details and guidance please consult your local agronomist or Megapoly dealer.
